**Expandable up  
to 4 cameras**

## Take the Stress Out of Your Next Adventure.

Brandmotion's wireless camera observation system is the highest resolution, most seamlessly integrated system available today. With a cleanly designed HD 7" DVR monitor and low latency wireless camera, images are crystal clear with virtually no lag. Sync up to 4 cameras at a time with a high strength signal that provides over 300 feet of range. The cameras support fast and easy pitch adjustments without the need for any tools. The kit also includes a unique bracket that allows for a low profile, clean integration of the camera to an RVs existing pre-wire mounting kit.
